The Genuine Cost-Effective Time-Cost Manufacturing Solution

In the new demand-driven era brands and retailers working to design new strategies to build more sustainable models that are made to last.

Means : producing on-demand, creating more sustainable products at higher quality levels, using more durable materials with clear provenance, delivering new, deeper customer experiences, and adopting best-in-class production and manufacturing methods to deliver it all.

Requires : from retailers and manufacturers to operate together on a new 'fair labor rates methodology' that is transparent and fit for that new demand-driven economy, it must use accurate and transferable labor building blocks so that operations can be standardized, the manufacturing methods and costs optimized.

As **SSD**, the former version of timeSSD®, was the first computerized time and cost benchmarking system for the sewing products industry in 1982 – a recognized universal standard – the **timeSSD®**, is the ever first collaborative labor costing SaaS platform for apparel brands and manufacturers, launched in 2017 at Texprocess – Frankfurt.

With the accumulated experiences during the years, as a SaaS solution hosted in Microsoft Azure, it offers in an **intuitive** way the same comprehensive capabilities in **costing optimization** and **method improvement**, for all garment sector players, on the same **incredible cost-effective** way.

By its new paradigm the big and small, beginner and veteran, brand and manufacturer, in fact all interested users and user groups, benefits of the same, browser based fast access from anywhere, in the today's possible highest flexible way, following the simple principle of **"pay as you go"**.

timeSSD® provides a unique, **common platform** in the Cloud for the fashion brands and manufacturers for fast, data driven and transparent discussions on the sensitive issues : cost, capacity, delivery, required quality.

Why
timeSSD®
N E X T   L E V E L   P E R F O R M A N C E

→ **Intuitive**
matrix style, easy accustomed interface

→ **Universal Available**
register and use it from the Cloud, no investment, no subscription

→ **Incredible Cost-Effective**
pay only for what you use

→ **Method Improvement**
eliminating the non-added value motions

→ **Costing Optimization**
by recognized universal standards

→ **Common Platform**
increasing transparency and trust
